Macfarlane, Heather, and **Leeann Haslouer**

- 1992 Meeker Ranch Project. *Lithic and Microwear Analysis of Flaked Stone* (contained within the appendix to the report). Prepared for the Meeker Ranch Estate.

ACADEMIC EXPERIENCE

- 2000– California State University, Northridge. Thesis project under the direction of Dr. L. Mark Raab: Experimental replication studies using high-power microwear analysis for functional determination of flaked stone tools from the early Holocene component of SCI-43, Eel Point, San Clemente Island. Course-work completed and thesis in progress.
- 1993 University of Oregon, Eugene. Performed excavations at Daisy Cave, San Miguel Island, under the direction of Dr. Jon Erlandson.
- 1989–1992 University of California, Santa Barbara. Developed independent research design for experiments with high power microwear analysis on chipped stone artifacts. Assembled a comparative collection of experimental chipped stone tools with diagnostic micro-polishes. Began research using Laser Ablation Spectroscopy to determine chemical composition of microwear polishes.
- Performed surveys, excavations, and laboratory analysis on various early Holocene sites on Vandenberg AFB, Gaviota State Beach, Sedgewick Ranch, and Hollister Ranch. Duties included the completion of site record forms, excavation recording, midden sorting, and preliminary analysis.
- Performed microwear analysis on chipped stone artifacts for various sites in Belize, Peru, and southern California.

SPECIALIZED TRAINING

- 2006 Hazardous Waste Operations and Emergency Response (HAZWOPER) 40-Hour Training, Allan Hancock College, Vandenberg AFB Campus; annual recertifications through March 2009.
